

# Power Process Control

## Selected as New Mod Center for Yokogawa Meters

Power Process Control (PPC) in Mexico now provides modification, repair, and certification for all Yokogawa meters for Mexico and Latin America. The Grand Opening was July 28<sup>th</sup> and many customers attended the celebration. Fred Zapico and Jorge Berrocal, from Yokogawa, and PPC's people Hector Ramirez, Oscar Peralta and others, offered technical support and sales presentations to the many customers.

Power Process Control (PPC) MOD center has the capability to handle large orders with short lead time delivery. PPC carries a large inventory of analog, digital panel, and switchboard meters, which can be modified to the customer specifications. PPC and Yokogawa can provide technical support to all current and potential customers for their business needs.

### **Power Process Control Offers**

- Enhanced Yokogawa Panel Meters sales in Mexico and Latin America
- Large order potential with short lead time deliveries
- Technical experience and a staff to support the business
